Referential CAD

The following table provides the inflator/deflator multiplier for calculating [referential Canadian dollars](#) (rCAD, r\$). It is based on the average annual CPI for Canada (*Statistics Canada, 2011*¹). The formula is the following:

$$\text{rCAD} = \text{nominal CAD} + (\text{nominal CAD} * \text{multiplier})$$

Year	CPI A.Avg	Base 2010	multiplier

[Canadian dollar inflation calculator](#)

Handy online calculator for estimating the value of the Canadian dollar over time. The calculator includes the inflation for 2010; thus, using it as your base year, you can estimate historical referential Canadian dollars (rCAD, r\$) with ease. The calculator seems to select a particular month for comparison, rather than the annual average, so it may result in small differences in the final output.

Measuring Worth

A handy website to learn about different inflation indexes and calculate the value of money according to those indexes.
