

# Countinng The Prime

T.Nakashima

July 27, 2014

Next number is prime.

$$10^{10000} + 28579$$

I'm calculating the number the form  $10^{100000} + \alpha$ .

My final aim is to find the form is  $10^{1000000} + \beta$ .

To find these numbers is reported to update this paper.
