

# **TIME TRAVEL AS A CONSEQUENCE OF PARANORMAL ABILITIES AND LONG-TIME EXPERIMENTAL RESEARCH**

**Akhmat Gemuev**

## ***Abstract***

My research includes study of time as a physical phenomenon, management of time and possibility of physical impact on living and nonliving objects remotely and through the time. Also, my research provides understanding of general structure of the world in a philosophical and physical senses, identification and explanation of hidden processes occurring in the world.

## ***The content of the article***

In this article I would like to tell about some of my scientific discoveries of global significance. First of all, I need to say that I am not a scientist in a conventional sense – I'm not an employee of scientific institute and have no any academic degrees in physics. However, I am an independent researcher who use complex of intellect, knowledge and special paranormal abilities that allows achieve such results in studying of the world which are inaccessible to the regular so-called 'scientists'. For many years I have been accumulating knowledge, adding new, repeatedly rechecking and systematizing them. It is worth to add that I have sent undermentioned information to the different media many times during last few years but got negative or no reply.

My research includes study of time as a physical phenomenon, management of time and possibility of physical impact on living and nonliving objects remotely and through the time. Also, my research provides understanding of general structure of the world in a philosophical and physical senses, identification and explanation of hidden processes occurring in the world.

Assumed that our world exists in three dimensions, nevertheless, Earth is currently transforming (or speaking more precisely, has already transformed) into the higher dimension, to a new stage of its development. Thus, the world is no more three-dimensional, but at least four-dimensional. While ordinary man lives in a three-dimensional perception I can perceive a much bigger number of measurements. It can be declared that physical factor of time is rapidly decreasing now regardless of whether a person feels the changes or not; time is nothing more than an illusion although people still look at the clock and live as before.

I have increased the level of paranormal abilities during the process of above-mentioned transformations. I have discovered the ability of transmitting of thoughts and smells on a distance as well as making a noticeable remote influence on electronics and health condition of living creatures. This became possible because of the unique properties of the psycho-emotional energy of my body.

But what is more important, I became able to implement these effects through the time. Figuratively speaking, I am a 'time machine' if we take into account the aspect of the past (indeed, the future too). In practice it looks like this. I look at the image of a live object (human, animal etc.) and use my subconscious for contact with subconscious of this object and can observe object's reaction towards my thoughts. This phenomenon works particularly well with the video records. For example I look at the actor/actress while watching a movie and my thoughts cause a change in his/her behavior which is not described in the script. Or I can mentally touch the actor/actress and see his/her reaction to the touch or concentrate on a particular smell and see how the people on the screen react to the smell depending on whether it is a pleasant or not. For example, I smoke a cigarette and see the actor's reaction to tobacco smoke according to his facial gestures. And this works despite the fact that this man, from a formal point of view, died many years ago. The same effect can be observed on the video documentary chronicles: for example, I successfully implement this experiment towards many historical figures of the past. Therefore, the one who wants to travel in time don't need to 'fly' to somewhere on a space ship with a light speed, - past and future are physically present everywhere, at any place. The only necessary thing to do this is a 'light speed' mind. Thus, I declare that I can transmit a sense of touch, smell, thought through the time (it would be better to say that I can operate with the time; the time generates a space and a space generates a

time). This phenomenon can be proved experimentally. To do this the one needs to compare the original video record with post-influence video record. In fact, all of the above-mentioned is largely, not to say entirely, changing the previous scientific knowledge.

□ It is also necessary to add the following for the correct understanding of many phenomena in the modern world. Humanity is not the only form of life in the universe. Many forms of life from the fourth dimension (so-called 'aliens'), whose interests are immoral in terms of universal concepts of morality, have got the ability of influencing on mankind in their own interests with much more easiness than it had been before the change of Earth's dimension. It's important to note that such phenomena as Earth's dimension changing, my ability of influencing on time and 'aliens arrival' are directly linked with each other. These 'aliens' use different methods of physical impact to implement gradual Earth destruction. For example, they provoke emissions of solar energy from the Sun toward Earth to collapse the Earth's magnetosphere. Also, such impacts help them steal psycho-emotional energy of human bodies. This energy makes them feel well and works as a construction material for implementing their immoral plans into reality. I need to add that energy of my body is immeasurably more powerful than of an average man. 'Aliens' have been stealing energy of my body hugely for many years, also, they have been helping for their accomplices among the people to do the same. As a result, these people can 'achieve' big success in life without putting any effort: weak become strong, mediocre - talented, ugly - beautiful, etc. Here are some of examples among Russian nation: victories of Russian hockey team at the World Championships in recent years, the number of medals won by Russian team at the Olympics in Sochi, successful presentation of Russian singers on 'Eurovision' contest or Putin's three presidential terms etc. (similar examples can be found among other nations). Thus, I declare that most of the victories and achievements in politics, sports, business, arts, show-business and other spheres of human activities in recent years are falsified and 'achieved' through the theft of my psycho-emotional energy.
