## **THE CITY OF GOD – THE QUINTESSENCE OF EXCLUSIVE HYPOTHESES FROM THE REMOTE PLACE**

The city of God is a product of galactic disintegration of the Universal White Hole.

## **THE CITY OF GOD – THE QUINTESSENCE OF EXCLUSIVE HYPOTHESES FROM THE REMOTE PLACE**

On a photo from the orbital Hubble telescope the huge white city soaring in space without visible communications with planets or other objects of the Universe is clearly visible. The found object has received the name City of God. According to computer data he settles down in the center of the Universe, has extent in several billion kilometers, rotates, without violating the traffic regulation of surrounding galaxies, and radiates unearthly light.

Experts from NASA consider that the City of God is the center of the Universe from which galaxies disperse. From there is a conclusion that not the center of the Universe is removed from our planet, and Earth is removed from him.

**Hypothesis:** The city of God is a product of galactic disintegration of the Universal White Hole.
