

## IN VAIN LOOK FOR THE CAT

Nikitin V.N., Nikitin I.V.

The Solar system should have no eighth planet, and gravitational impact on planets of Solar system is exerted by her power cover.

## IN VAIN LOOK FOR THE CAT

*It is very difficult to find in the dark room a black cat, especially, if she isn't there.*

*Confucius*

Scientists persistently and without results try to find the eighth planet behind an orbit of Pluto. And whether she has to be? We offer exclusive hypotheses which indicate that behind an orbit of the Neptune the power cover of Solar system begins, and objects which are in this zone are just satellites of Solar system. Pluton and Mercury – the remains of comets.

Hypothesis: the Solar system should have no eighth planet, and gravitational impact on planets of Solar system is exerted by her power cover.
