

THEY WILL BE TOGETHER

Nikitin V. N., Nikitin I. V.

Milky Put and Andromeda won't face, they will just merge in a uniform power stream, like charged particles.

THEY WILL BE TOGETHER

Thanks to computer technologies experts to Lars Hernkvist (Harvard University) and to Case Western Reserve University managed to design the future of our civilization and to come to very ambiguous conclusion. According to calculations of the American astrophysicists every second the Milky Way and Andromeda come nearer to each other on 120 kilometers. On predesigns they will face through one-two billion years. Many experts consider that the Milky Way and Andromeda won't face, and will merge, having created so-called Mlekomeda.

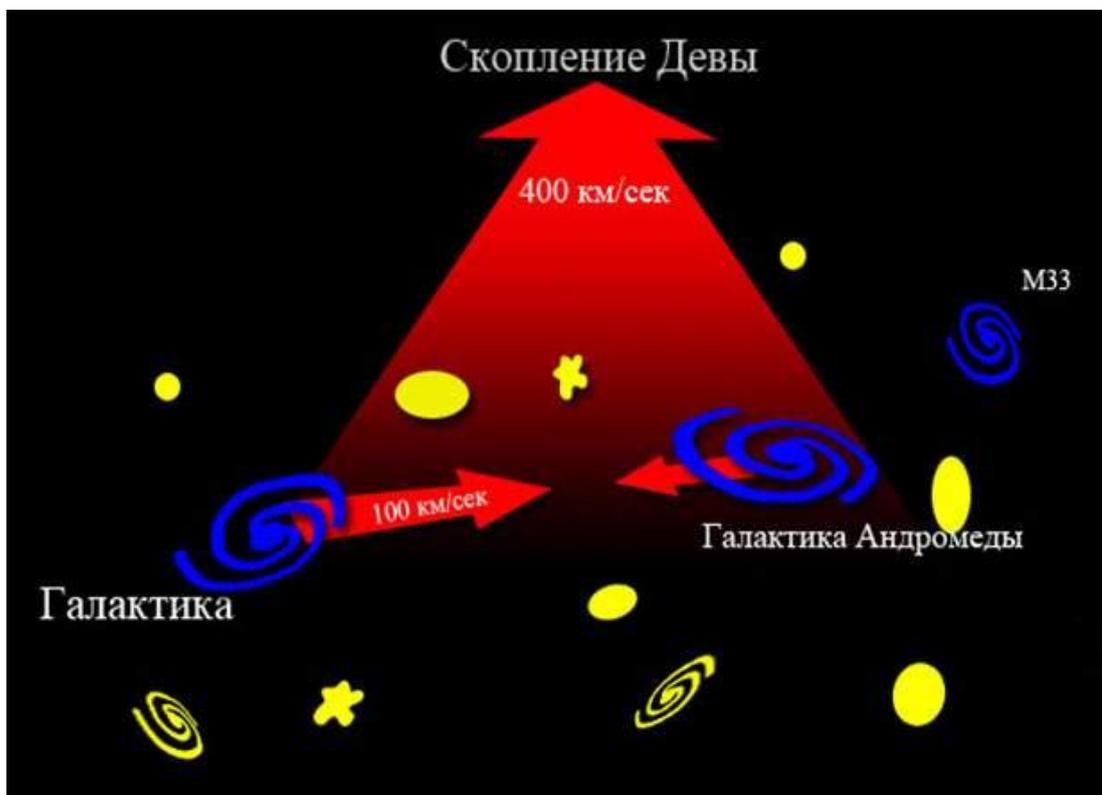

Fig. 1. Speed of the movement of the Galaxy the Milky Way to the Maiden's congestion.

In turn, the group of galaxies which enters also the Milky Way as a certain whole moves to a big congestion of the Maiden with a speed of 400 km/s. This movement is also caused by gravitational forces and is carried out rather remote congestions of galaxies.

Hypothesis: Milky Put and Andromeda won't face, they will just merge in a uniform power stream, like charged particles
