The argument that the Universe may have been created by a higher Intelligent being which one may call GOD.

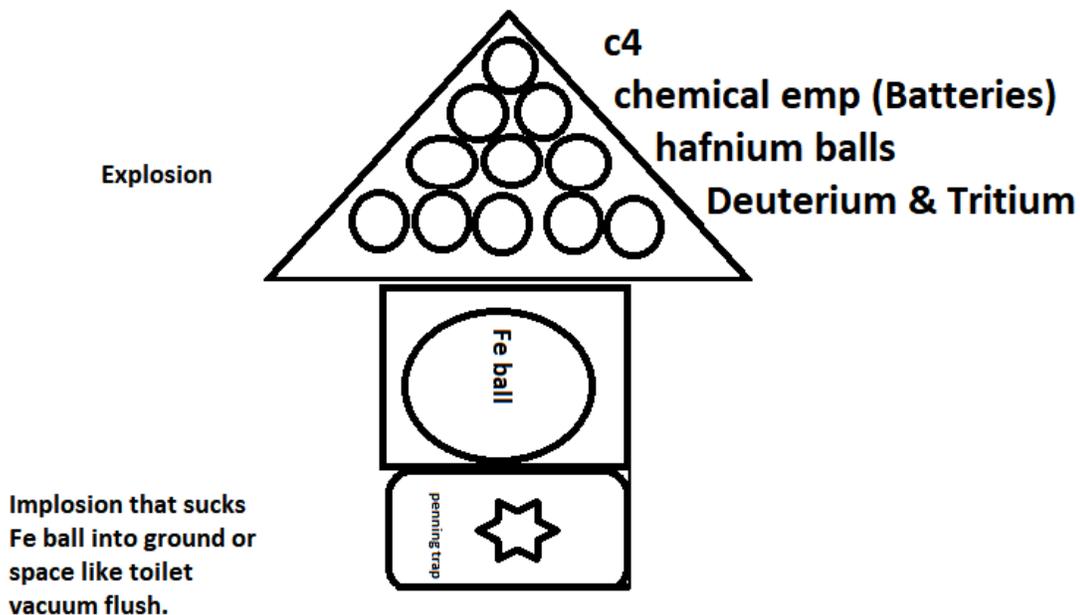

My argument is simple, I offer the Bob Lazar video as visual proof.

The proof is that he knows how to make an accelerator that can create Dark Matter and or Dark Energy.

If above is true (area 51 &52) then the below is possible.

Darkmatter Device

Warning: This will cause an explosion and an implosion, and can create another universe.
