

Is the city of Neom the fulfillment of the prophecy of Endtimes Edom?

By Leon Elshout, almelo, NL, 24/2/2020, <https://roodgoudvanparvaim.nl>

Saudi Arabia is gonna change it's landscape that borders the Red Sea. What now is a desert crowded with scorpions will be changed into a futuristic city, named Neom. The city will be home to flying cars and robotic dinosaurs. The city will create clouds and it's own atmosphere. The location of the city is quite interesting because it is where former Biblical Edom was located. Edom was the land of Esau who was Jacob's brother. Both were sons of Isaac and Rebecca. Isaak and Ishmail were sons of Abraham.

In Isaiah 63 we read that the second coming of Jesus will start from Edom. The norther part of Edom stretches to the cities of Bozra and Petra in Jordany. The southern part will be 300 or 400 kilometers south from that. Neom will be a giant futuristic city. Is it there where Jesus will take off his second coming and his march on Jerusalem?

The building of Neom is incorporated in a bigger project that is named "Vision 2030". This is interesting because we would expect the return of Jesus in 2030, two thousand years after His resurrection. Other prophecies that have to be fulfilled yet are the rebuilding of the Third Temple in Jerusalem and the rebuilding of Babylon. If the Saudi's rebuild Edom/Neom, then Israel will rebuild Babylon.
