

Different Levitation Systems Observed in Big Basin UFOs, EMEC and Anti Maxwell Effect and Free Energy.

By Leo Vuyk
Architect, MSc.

Abstract,

In Quantum FFF Theory, there are different levitation systems possible observed in Big Basin UFOs. Two systems (1,2) are assumed to use a new physics magnetic field effect called “Anti Maxwell Dip” effect dependent of the conductor diameter around each current in a wire without an equal reaction force. According to Quantum FFF Theory.

The third system (EMEC) is a new physics centrifugal effect based on Electron Muon conversion in a torus shape, also without reaction force. (3)

2e, The Triple Different Diameter Electric wire Lorentz levitation effect. (TDDE)

3e, The EMEC : Electron- Muon-Electron Conversion centrifugal effect.

This new physics Dual Centrifugal Synchrotron Thruster EMEC, is based on a new physics compound Rigid String Theory called Quantum Function Follow Form Theory.

In physics, it is well known that the three simplest Fermions differ in actual mass.

From lightweight to heavy, they are called Electron, Muon and Tau particles. (fig. 1)

The Q-FFF Theory these propeller shaped particles are assumed to be spinning by collision with the local oscillating vacuum vector field called Axion-Higgs field. The Axion Higgs field particle is assumed to have a torus form. It is the mother form of all the other singular Transformable Rigid String particles. (fig. 2)

An electron can be equipped with 2 additional compound Photon/Gluons to form a Muon particle, which has 200x more mass than the Electron.

The measured mass ratio between Electrons and Muons are 1: 200 or about 0.5 MeV: 100MeV.

Title: Electron- Muon- Electron rigid string Conversion for Space flight (EMEC)

The craft is equipped with two concentric storage tube rings with mutual electric radiation lasers based ring change channels producing Centrifugal Force for spaceflight.

EMEC means Electron Muon Electron conversion. The mass difference between Electrons and Muon are supposed to be able by mutual laser conversion and ring changing to produce a centrifugal force strong enough to accelerate the Craft everywhere in space. (Figure 3)

Together with additional Electricity production inside the craft, this system will be able to independently operate for space transportation.

According to Quantum FFF theory, all magnetic fields can be presented as DUAL Magnetic Monopole Photon Vector Arrays. These monopole arrays undergo curvature. As a result, the magnetic field intensity around the Earth and a wire is NOT dropping off with the square of the distance from the source!! The field become stronger polarized away from the source (See images). Close to the current transporting wire the magnetic field strength is zero due to the parallel trajectories of North and South Photons before curvature and polarisation of iron powder. Conclusion: all stable BH nuclei represent all Dark Matter in the universe.

Non stable evaporating BH nuclei can be called Ball Lightning or micro comets.

The boundary between these two types is unknown.
